

Supplement No. 1
to the Arrangement between the Electronic Communications Office
of the Republic of Latvia and the Administration of the Russian Federation
concerning the use of the frequency bands 880-890 MHz / 925-935 MHz for terrestrial
E-GSM systems in border areas (Riga, May 17, 2013)

The Telecommunication Administration of the Russian Federation and the Telecommunication Administration of the Republic of Latvia have agreed to modify the Arrangement between the Electronic Communications Office of the Republic of Latvia and the Administration of the Russian Federation concerning the use of the frequency bands 880-890 MHz / 925-935 MHz for terrestrial E-GSM systems in border areas (Riga, May 17, 2013) as follows here below:

1. Item 2.1.1 shall be added to Article 2 to read as follows:

“2.1.1. Either Party may use for broadband systems any channel block of its preferential channels without coordination with the other Party, if the field strength of each carrier produced by the base station does not exceed $(33 + 10 \times \log(BW/5 \text{ MHz})) \text{ dB}\mu\text{V/m}$ in locations 15 km into the territory of the neighbouring country, where BW is the bandwidth of the channel block.“

2. Item 2.2.1 shall be added to Article 2 to read as follows:

“2.2.1. Either Party may use for broadband systems any channel block without coordination with the other Party, if the field strength of each carrier produced by the base station does not exceed $(33 + 10 \times \log(BW/5 \text{ MHz})) \text{ dB}\mu\text{V/m}$ at the border, where BW is the bandwidth of the channel block.“

This Supplement shall become effective on the date of approval by the Telecommunication Administration of the Russian Federation.

Moscow, 4 August 2017
