

## Supplement No. 1

### to the Arrangement between the Electronic Communications Office of the Republic of Latvia and the Communications Regulatory Authority of the Republic of Lithuania concerning the use of the frequency band 2500-2690 MHz for terrestrial systems for Mobile/Fixed Communication Networks (MFCN) in border areas (Vilnius, 31<sup>st</sup> January 2013)

The Electronic Communications Office of the Republic of Latvia and the Communications Regulatory Authority of the Republic of Lithuania have agreed to modify the "Arrangement between the Electronic Communications Office of the Republic of Latvia and the Communications Regulatory Authority of the Republic of Lithuania concerning the use of the frequency band 2500-2690 MHz for terrestrial systems for Mobile/Fixed Communication Networks (MFCN) in border areas" (Vilnius, 31<sup>st</sup> January 2013) as follows here below:

Item 2.3 of Article 2 shall be amended to read as follows:

"2.3. Each Party may use the 2570-2620 MHz frequency band for stations in the TDD mode without coordination with the other Party if the predicted mean field strength produced by the cell (all transmitters within the sector) does not exceed the value of 30 dB $\mu$ V/m/5MHz at the border."
